

Plain LogoMikes® are available from www.logomike.com

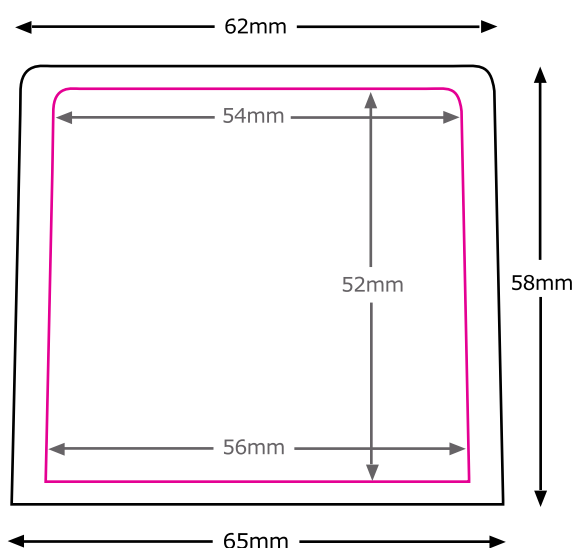

How to decorate LogoMike® Mic Flags...

LogoMike® Professionally printed broadcast quality Mic Flags are permanent – long lasting - hard-wearing – chip, scratch resistant and waterproof. The vinyl paint print is UV cured in to the surface of the plastic so it can withstand all the harsh rigours of indoor and outdoor broadcasting and can last in excess of 10 years.

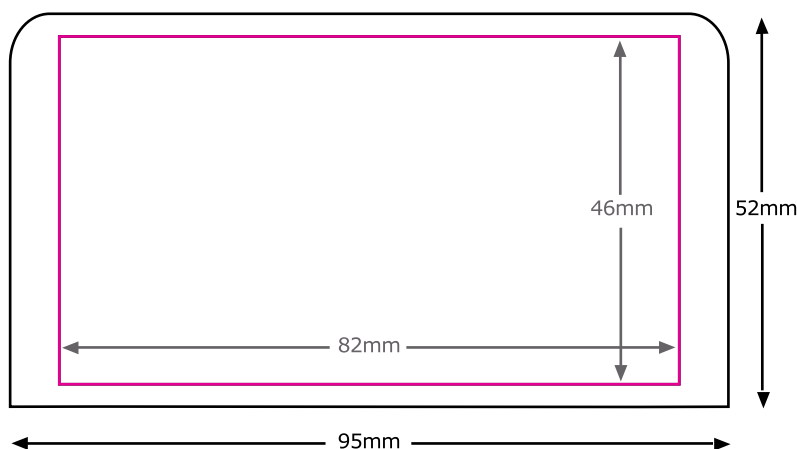

If however you are working on a tight budget or for short term amateur use, you can buy Plain LogoMikes from our website or from one of our distributors and decorate them yourself using self-adhesive stickers. These can be bought from Staples, P.C. World, etc and other good stationers. The best sort to buy is the matt finish, as glossy ones will reflect light back 'on camera'.

Using the measurements or template below, do your artwork on a computer, print it out, cut to shape and carefully stick the stickers on to the sides of the LogoMikes®. It's a good idea to do more stickers than you need, so when they get dirty around the edges, peel the old ones off, wipe down the sides of the LogoMikes® with white spirit and apply new ones.

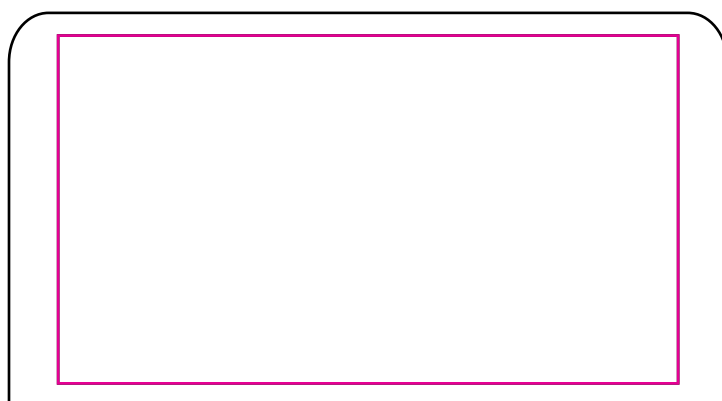

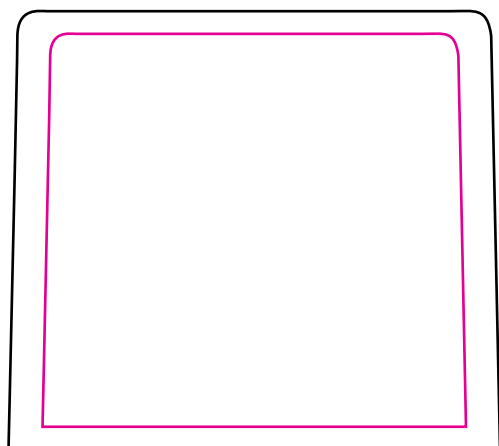

They may not look quite as good or last as long as what professional broadcasters use, but this is a very economical 'do it yourself' method to produce your own customised LogoMike® Mic Flags - and promote your name to a wider audience. Good luck!

LogoMike® Cubes (4 sides)
Product dimensions shown above in Black.
Print Area shown above in Magenta.
Or use the plain template below

LogoMike® Triangular Shape (3 sides)
Product dimensions shown above in Black.
Print Area shown above in Magenta.
Or use the plain template below
