

C3 Server Settings

Date: Nov 2, 2023 V1.0

1. Login the XUI panel by http://your server ip:54321 after the bonding server built.

default username: admin Password: Mine123456

You can change the username and password from the panel settings - user settings if needed. [image2]

your server ip:54321

	Confirm		Ima	qe 2	

2. Select the left "Inbounds" tab and click

EDRouter

to add inbounds for your M4 device.

- 2.1 for the **Protocol**, select the vless.
- 2.2 In the Total traffic (GB) box, 0 means no limit.
- 2.3 the expire date of the inbound rule.

2.4 Transmission select the ws

2.5 The port 54322 is used for aggregating traffic. It is recommended to set this port to 54322. Please ensure that the C3 Bonding server port 54322 is opened accordingly. Others keeps them as default, click **[Add to]** to save the Inbounds.
