

23560 Microphone bar

- Stand connection: 3/8"
- extra long
- for 6 microphones
- adjustable distances

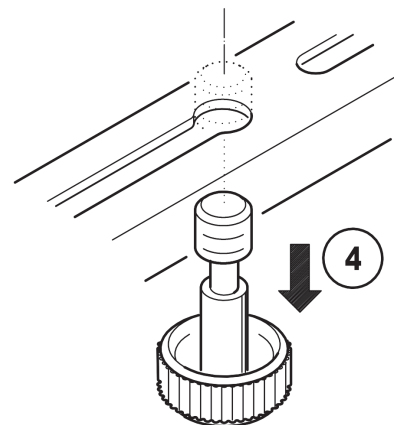

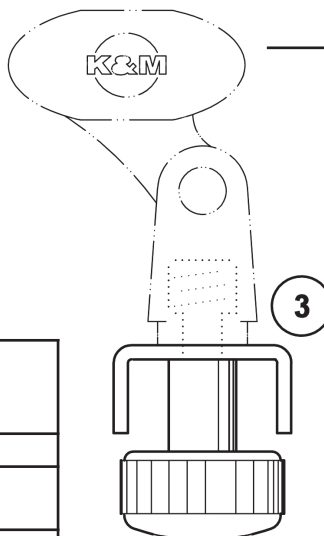

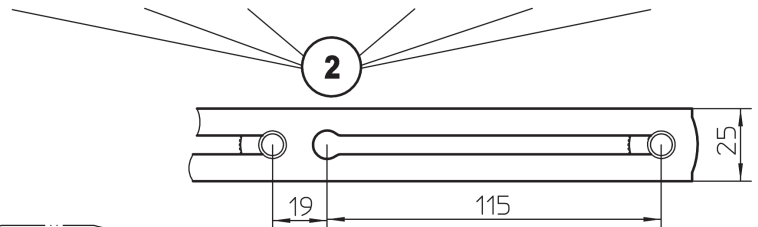

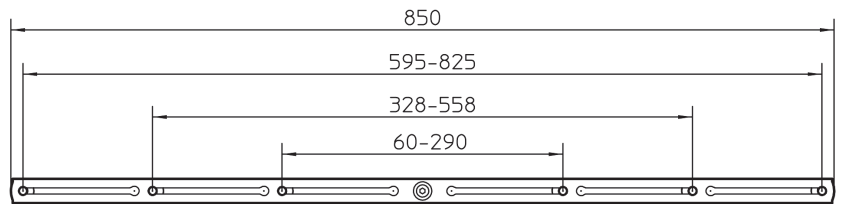

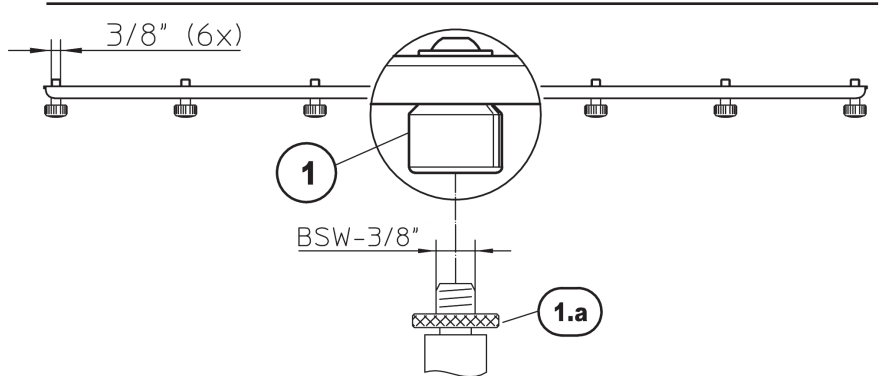

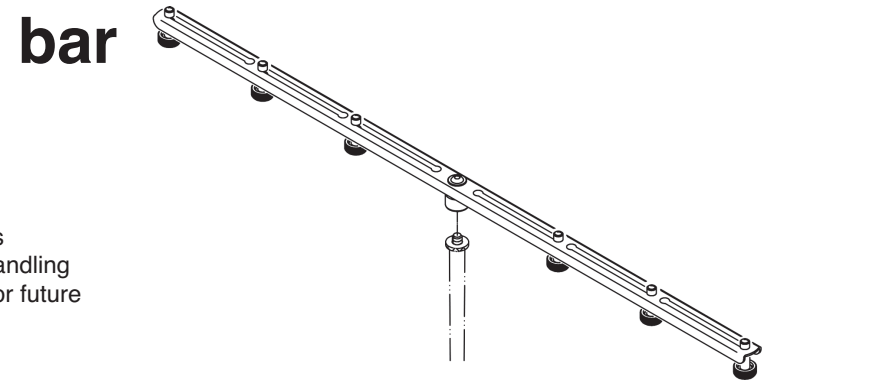

Thank you for choosing this product. The instructions provide directions to all of the important setup and handling steps. We recommend you keep these instructions for future reference.

SAFETY NOTES

- Exclusive use for holding microphones, other equipment may not be used.
- Equipment should be balanced across the entire microphone bar (not one-sided)
- Ensure that there is enough distance to the rail, in particular if it is set at eye-level height
- To care for the product use a damp cloth and a non-abrasive cleaning agent.
- Select suitable stands/connectors and follow the safety notes.

SETUP INSTRUCTIONS

- 1 In the center of the microphone bar there is a 3/8"-threaded bushing with a female thread. This threaded bushing is screwed onto the microphone stand. The connection should be tight. Use the counter nuts (1.a) on the stand.
- 2 The microphone bar has six slits. Each slit has a knurled screw with a 3/8" thread to attach the microphone.
- 3 The microphone can be adjusted variably and placed in the desired position. Tighten the knurled screw, but not too tightly.
- 4 If 6 microphones are not used at the same time the extra knurled screw can be removed from the slits. This ensures that annoying noises are not produced during recording sessions. To remove the knurled screw, move it to the end of the respective slit and take it out through the drill hole.

TECHNICAL DATA / SPECIFICATION

Material	Rail: Steel, powder coating, black Threaded bolts: Steel, galvanized Knurled handles: PA
Load	Microphones
Dimensions	Rail: 850 x 25 x 2 mm, 6 x 3/8"-knurled screws
Packaging	Box 850 x 72 x 45 mm
Weight	0.62 kg
Accessories (optional)	Microphone clips 85035/50/55/60/70 Popkiller 23956/66
