ASS-122 : RF distribution for ENG/Movies

Now shipping !

Limited in time offer : 6 free SMA 50ohms termination

Designed for on field applications

ASS-122 allows you to improve your RF coverage. Use active or passive antennas thanks to the built-in DC-feed. Detect a short circuit on each channel to be sure your set-up is ok.

ASS-122 has also 2 RF indicators that shows when the signal becomes too strong. With this feature you will be able to keep safe from external disturbances.

BSRF designs and produces systems allowing to achieve extended radio coverage.

Key Features

- ◆ New filtered inputs, with excellent impedance matching
- ◆ Low noise, so you can receive very low signal and thus improve your coverage
- ◆ Eco friendly aluminium made enclosure and panels
- ◆ Compatible with all wireless systems, (analog and digital modulation)
- ◆ Built-in DC-feed and RF peak
- ◆ High quality connectors to guarantee reliable operation through time
