# **Panasonic**

AG-CX350
Memory Card Camera Recorder

WIDE ANGLE LENS

NDIIHX CONNECT

Panasonic developed the new CX Series of handheld camcorders, spearheaded by the AG-CX350, to fuse video, on-air broadcasting, and communication for the next generation. The AG-CX350 features 4K/UHD resolution, 10-bit depth, HDR-compatible image quality, and a host of recording formats for the ultimate creativity in a compact, lightweight body with low power consumption. It is also equipped with an RTMP/RTSP function for live streaming and NDI | HX-ready IP connectivity, to serve as a live camera, and clearly expands the usability of the handheld camcorder beyond conventional news gathering and recording applications to meet a wide range of professional needs.

## The wide-angle, high-magnification lens and new 1.0-type sensor ensure recording of high-quality pictures in 4K/HDR.

#### Wide-Angle 24.5mm\*1 Optical 20x Zoom, Plus i.Zoom

An image shot in a room using the wide angle.

Panasonic boasts the world's largest market share in the aspherical lens segment. Its cutting-edge optical technology was maximized in the development of the integrated lens used in the AG-CX350. This lens has the industry's widest angle of 24.5mm<sup>-1</sup> on the wide end and

allows recording of wide-angle images with minimal distortion, without the use of a conversion lens. The optical 20x zoom covers up to 490mm telephoto in all modes. Furthermore, the i.Zoom enables seamless zooming of up to 32x in HD or up to 24x in UHD from the telephoto end with no degradation in resolution. The AG-CX350 also comes with digital 2x/ 5x/10x zoom."

\*1: In 35mm equivalent. The AG-CX350's wide 24.5mm angle is the widest in the industry for UHD/FHD (16:9). In the segment of camcorders with integrated lens, the Panasonic AG-UX180 achieved the industry's widest angle of 24mm in UHD/24p (17:9). For UHD/FHD (16:9), 25.4mm is the widest angle in the industry. (Both as of January 2019, according to a Panasonic survey)

\*2: When using the digital zoom, picture quality degrades as the magnification rate increases.

#### New High-Definition, High-Sensitivity 1.0-type 4K MOS Sensor

The 1.0-type MOS (approximately 15,030,000 pixels) offers an outstanding depth of field and excellent balance between image quality and sensitivity. It supports multi-formats, such as UHD (3840 x 2160), FHD, HD and SD, and provides images without cropping in all modes. This MOS sensor also boasts high sensitivity of F12

(60 Hz) /F13 (50 Hz) (in both UHD and FHD in High Sensitivity mode).

#### **Built-in 5-Axis Hybrid Image Stabilizer**

The AG-CX350 has a built-in hybrid image stabilizer that combines optical and electronic camera shake compensation functions. It corrects camera shake in five axial directions in all modes\* including UHD to provide powerful camera shake compensation power in low-angle shooting, high-angle shooting and all other unstable conditions. There are three modes to choose from: NORMAL (standard), STABLE (effective for fixed-frame shooting) and PAN/TILT (effective in panning

\* Excluding Super Slow and VFR modes.

and tilting).

#### **HDR-Compliant HLG (Hybrid Log-Gamma)**

HDR (High Dynamic Range) Image

The AG-CX350 features HLG (Hybrid Log-Gamma)\* to support HDR (High Dynamic Range). This achieves a wide dynamic range on HDR-compatible TV monitors. The gamma mode can be selected from eight modes (HD, SD, FILMLIKE 1, FILMLIKE 2, FILMLIKE 3, FILM-REC, VIDEO-REC, HLG).

\* The HLG specification was developed jointly by Japanese broadcaster NHK and the BBC in the UK. It is defined in ARIB STD-B67 and ITU Rec. 2100.

#### **Intelligent AF and Focus Assist**

The AG-CX350's auto focus system is Intelligent AF, which is equipped with a micro drive focus unit to achieve high focusing speed, excellent tracking performance and superb stability. The AG-CX350 is also equipped with Expand and Peaking (simultaneous display possible), Manual Focus Assist, LCD Touch Focus (switchable to Auto Iris or brightness display) and One-Push AF Focus Assist.

#### **Manual Three Rings**

The AG-CX350 comes with Manual Three Rings for zoom, focus and iris control. They deliver quick response and provide tactile feel that satisfies professionals. The zoom lever located at the upper section of the handle has a multi-step variable zoom function, allowing smooth zooming from ultra-low speed when shooting from low angle shooting and when a tripod is used.

Manual Three Rings

#### **Cabled/Wireless Remote Control Capability**

The remote terminal (2.5-mm super mini jack) enables the control of the focus, zoom and iris using a remote controller (third-party product). It also supports wireless remote control using a tablet or smartphone (iOS, Android OS). (See page 5 for details.)

Example of third-party remote controller

## Supports multi-codec recording of high-quality 10-bit images without cropping in all modes.

### New HEVC Codec for High-Image-Quality 10-bit UHD/60p Recording at Low Bit Rate

The AG-CX350 is capable of recording in various formats at different compression rates (see the table below). It can record UHD/60p videos in high-image-quality 10-bit on an SD memory card. It also features a new, high-efficiency HEVC codec (LongGOP, 10-bit, 4:2:0, MOV) . When a PC with 7th Generation Intel Core i7 processor is used, the hardware acceleration enables native decoding and

#### 10-bit Variable Frame Rate (VFR) without Cropping

In UHD, variable frame rate (VFR) recording at 1 fps to 60 fps is possible. In FHD, super-slow can be realized at a maximum of 120 fps. Both provide high-quality 10-bit, full-frame pictures with no image area cropping even at high frame rates.

Simulated image

#### MOV/AVCHD/P2 MXF\* File Formats Supported

The AG-CX350 records MOV files that are highly compatible and easy to use. This file format is the same as that used on Panasonic's compact cinema camera, the AU-EVA1, and supports file names with up to 20 characters, allowing recorded video clips to be easily managed. The AG-CX350 also supports conventional AVCHD recording, including the AVCHD 8 Mb/s mode, used widely as the format in college and professional football coaching analysis. And it will support the MXF P2 file format for broadcasting in the future,\* enabling AVC-Intra or AVC-LongG recording.

\* Future support by a firmware version upgrade for recording onto microP2 cards.

#### Freeze Frame (Still Image Capture)

When playing back video clips on the AG-CX350, any desired frame can be captured as a still image (JPEG) and recorded onto an SD memory card. Video playback, frame advance (+/-), and still-image captures can all be done intuitively by touch panel operation.

#### **Double Memory Card Slots Improve Recording Reliability**

Two SD memory card slots capable of using SDXC/SDHC/microP2 cards enable unlimited\*2 relay recording by simply changing SD memory cards. Recording reliability is further improved with simultaneous recording and background recording. And the AG-CX350 is equipped with Pre Rec, Interval Rec and Time Stamp recording functions.

\*1 For memory card usage conditions, see the "Recording Media" chart on the rear page.
\*2 If the Relay recording time reaches 10 hours, shooting will temporarily stop, and then automatically restart a few seconds later. If it is recorded in MOV format, the file will be split every 3 hours and recorded.

### Unlimited\* Relay Recording

Automatically records continuously from Slot 1 to Slot 2. By changing a full card with a new card, images can be recorded continuously for many hours.

#### Simultaneous Recording

Identical data is recorded onto cards in both slots in this dual recording mode.

#### Background Recording

Records ordinary Rec Start/ Stop-controlled data in Slot 1, and records all data, even when Slot 1 is stopped, in Slot 2.

#### **Recording Format**

Reco	rding Format	Pixels	Color Sampling	Bit Depth	Bit Rate	File Format	System Frequency	VFR*	Audio
UHD	HEVC LongGOP 200M	3840 x 2160	4:2:0	10 bit	200 Mbps VBR	MOV (HEVC)	59.94p, 50p	1 to 60 fps [50 fps]

### System functions designed for live streaming. Functionality and operability engineered for professional use.

#### RTMP/RTSP-Compatible HD Streaming

HD streaming is possible while images are being acquired. Both RTSP and RTMP streaming methods are compatible. And Facebook, YouTube, and other streaming services are supported. The AG-CX350 can be used for live coverage of concerts and sports events as well as for live streaming of breaking news.

YouTube

\* P2 Network Setting Software is required for the use of the RTMP function. See the section, "Connectivity-verified live video services," for the live video streaming services that have been confirmed to be compatible.

#### Easy IP Connection: Preinstalled NDI | HX\*

The AG-CX350 is the industry's first camcorder to support NDI | HX.\* Equipped with NDI | HX mode, it allows video transmission and camera control via IP connection, without using an external converter. When connected to a system configured with the AV-HLC100 Live Production Center and

HN/UN series PTZ integrated cameras, the AG-CX350 realizes end-to-end live video production of live events as well as web distribution.

- · NDI: Network Device Interface, a technology of NewTek, Inc.
- \* Industry's first camcorder to support NDI | HX. As of January 2019 (according to a Panasonic survey). To use this function, an activation keycode from NewTek is required. Keycodes can be purchased from the following website: http://new.tk/ndi\_panasonic

#### Wireless Control from a Tablet or Smartphone

The AG-CX350 can be controlled remotely and wirelessly using a tablet/smartphone app<sup>-1</sup> (downloadable for free from the App Store or Google Play). In addition to zoom, i.Zoom and focus lens control, the app enables remote control of various other functions, including camera setting, picture quality adjustment, REC start/stop and menu setting. What's more, the app can be used to select the camera to control from up to eight cameras.\*2

Android devices: Android 5.0 or later are supported. Wireless module (sold separately; AJ-WM50 or recommended third-party Wi-Fi dongle) is required.

\*1: iPad: iOS 9 or later are supported.

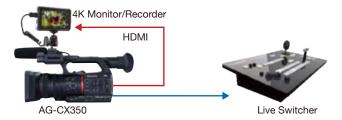

·2: The app does not support simultaneous/synchronous control of multiple cameras. Camera switching takes several seconds

#### Parallel Output of SDI and HDMI

SDI and HDMI can be output in parallel. Output of UHD video via HDMI and output of HD video in high-image-quality 10-bit, 4:2:2 via SDI enable a variety of uses. In HLG shooting, either HDR or SDR can be selected for each of the SDI, HDMI and LCD video outputs.

#### TC Synchro Multi-Camera Recording Supported

The TC IN/OUT terminal (BNC) allows synchronization of the time code in multi-camera shooting. The camera number (A to Z) can be added\* to the name of the recording folder to facilitate editing.

\* Only when the MOV codec is used for recording. Setting must be made in each camera.

#### Simultaneous Display on High-Brightness, **High-Definition LCD and High-Resolution OLED EVF**

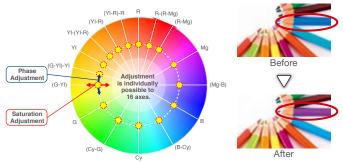

The AG-CX350 features a new 3.2-type high-definition LCD monitor (approximately 1,620,000 dots). This LCD monitor uses the RGBW (red, green, blue, white) pixel structure to provide high visibility even in bright sunlight. The 3:2 aspect ratio enables the display of timecode and camera status without

superimposing on the image. The touch panel function allows convenient touch focus and menu setting. The viewfinder is a highresolution color OLED (approximately 2,360,000 dots, with an image display area of approximately 1,770,000 dots) that offers superb color reproduction. Since the AG-CX350 newly supports simultaneous LCD and EVF outputs, the LCD monitor can display the captured image at all times even when you look away from the EVF.

#### **Broadcast-Grade Picture Quality Adjustment Functions**

- 16-Axis Independent Color Correction: Provides an independent effect to each of the 16 phases of video images. It enables color matching of multiple cameras under the same lighting conditions as well as creative image rendering.
- · Master Detail: Adjusts the overall degree of contour enhancement.
- · Skin Detail: Makes skin colors appear soft and beautiful.
- · Scene Files: Six preset files are provided. You can change any of the settings as desired.
- · Other Picture Settings: Matrix tables, V detail, detail coring, chroma level, chroma phase, color temperature, master pedestal and knee.

#### 24-bit PCM Supporting High-Resolution Audio

The use of the built-in stereo microphone or XLR input (switchable 48-V phantom power supply/MIC/LINE) allows 2-channel audio recording. In MOV mode, 24-bit linear PCM recording delivers higher sound quality. Future firmware update will enable 4-channel recording.\*1 Other audio features include manual volumes, OSD level meter, 1 kHz test tone output 2 and headphone output (3.5 mm-diameter stereo mini jack).

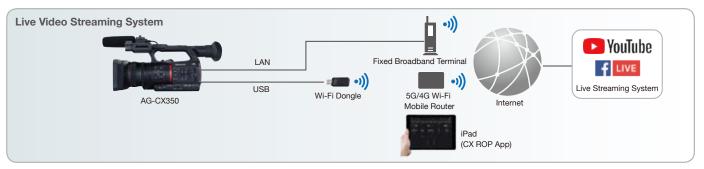

- \*1: When MOV is selected as the main recording format, the AG-CX350 enables 4-channel recording using the built-in microphone (2 channels) and XLR (2 channels). In AVCHD mode, only 2-channel recording is possible.
- \*2: This output is produced when the color bar is displayed. When the 50 Hz system frequency is selected, the output is 997 Hz.

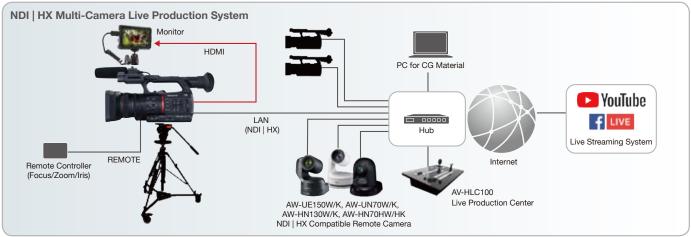

#### Low Power Consuming, Large-Capacity Battery, Quick Charge

The AG-CX350 boasts low power consumption of 11.5 W (in factory setting, with no devices connected to the terminals), which is the industry's lowest in the UHD/HD 10-bit recording camcorder segment. The maximum power consumption is only 17 W (HEVC recording, LCD turned ON, devices connected to the terminals).\*1 With the supplied battery pack (5900 mAh), the AG-CX350 operates continuously for about 3 hours and 20 minutes. This large-capacity battery pack supports quick charges.\*2 For product details, see page 6.

- \*1: As of January 2019. According to a Panasonic survey.
- \*2 Quick charge is possible only when the AG-BRD50 battery charger is used.

Memory Card Recorde
---------------------

	As of January, 2019
Memory Card Red	corder
Recording Media:	SDHC memory card (4 GB to 32 GB), SDXC memory card (32 GB to 128 GB) UHS-I/UHS-II UHS Speed Class3 supported, Video Speed Class V90 supported microP2 card (A series, B series) Please see back cover for the "Available Memory Card" table.
Recording Slot:	microP2/SDXC UHS-II card slot x 2
Recording Pixels:	$3840 \times 2160$ (UHD), $1920 \times 1080$ (FHD), $1280 \times 720$ (HD), $720 \times 480$ (SD), $720 \times 576$ (SD)
System Frequency:	59.94 Hz/50.00 Hz
Recording File Format:	MOV (AVC), MOV (HEVC), AVCHD
Recording Format:	Please see page 4 for the "Recording Format" table.
Recording Time:	Please see back cover for the "Recording Time" table.
2 Slot Functions:	Relay Rec, Simultaneous Rec, Background Rec
Special Recording Fun	ctions: Pre Rec, Interval Rec, Time Stamp
Digital Video	
Quantization:	MOV: 4:2:2 10 bit/4:2:0 8 bit/4:2:0 10 bit (HEVC) AVCHD: 4:2:0 8 bit
Video Compression Fo	rmat: H.264/MPEG-4 AVC High Profile H.265/MPEG-H HEVC Main10 Profile
Digital Audio	
Recording Audio Signal:	MOV: 48 kHz/24 bit, 2 ch, Linear PCM AVCHD: 48 kHz/16 bit, 2 ch, Dolby Audio™
Headroom:	12 dB/18 dB/20 dB switchable (menu)
Live Streaming	
Video Compression Fo	rmat: H.264/MPEG-4 AVC Main Profile, High Profile
Audio Compression Fo	rmat: AAC-LC
Network Protocol:	RTSP/RTP/RTMP

	AAC-LC	
Network Protocol:	RTSP/RTP/RTMP	

#### **Video Output**

	• 1820 × 720: 59.94p, 50p, 59.94i, 30i, 29.97p, 25p, 25.96p • 1280 × 720: 59.94p, 50p • 720 × 480: 59.94p • 720 × 576: 50p
	• 3840 × 2160: 59.94p, 50p, 29.97p, 25p, 23.98p • 1920 × 1080: 59.94p, 50p, 59.94i, 50i, 29.97p, 25p, 23.98p
	VIERA Link not supported Output format (4:2:2 10 bit):
HDMI OUT :	HDMI x 1, Type A, HDMI REC REMOTE supported,
	• 720 × 480: 59.94i • 720 × 576: 50i
	• 1280 × 720: 59.94p, 50p
	29.97Psf, 25Psf, 23.98PsF
	• 1920 × 1080: 59.94p, 50p, 59.94i, 50i,
	Output format (4:2:2 10 bit):
	HD: $0.8 \text{ V } [p-p]$ , $75 \Omega$ SD: $0.8 \text{ V } [p-p]$ , $75 \Omega$ ,
SDI OUT:	BNC x 1, SDI REC REMOTE supported

#### VIDEO OUT: 3.5~mm diameter mini jack, composite 1.0 V [p-p], 75 $\Omega$ **Audio Input/Output**

tadio ilipao odipat				
Built-in Microphone:	Stereo microphone			
Input 1/2:	XLR (3-pin) x 2 (INPUT1, INPUT2) Input high impedance, LINE/MIC/MIC+48V (switchable SW) MIC: -40 dBu/-50 dBu/-60 dBu (switchable menu) LINE: +4 dBu/0 dBu (switchable menu)			
SDI OUT:	Linear PCM 2 ch			
HDMI OUT:	Linear PCM 2 ch			
Headphone:	3.5 mm diameter stereo mini jack x 1			
AV OUT:	3.5 mm diameter stereo mini jack x 1, Output level: $600~\Omega$ , 316 mV			
Speaker:	20 mm diameter, round x 1			

#### Other Input/Output

Used as the input and output terminals (switchable menu) Input: 1.0 V to 4.0 V [p-p] 10 K $\Omega$ Output: 2.0 V $\pm$ 0.5 V [p-p] low impedance
2.5 mm diameter super mini jack
RJ-45: 1000BASE-T/100BASE-TX/10BASE-T
Type-A, 4-pin (5 V, 0.5 A) for Wireless Module (option)
USB 3.1 GEN1 Type-C, USB Mass storage function No USB bus power function
DC 12 V EIAJ Type 4

#### Monitor/Viewfinder

LCD Monitor:	3.5 type TFTLCD color monitor (3:2), approx. 1,620,000 dots, Touch panel video display (16: 9) area: Approx. 1,370,000 dots		
Viewfinder:	0.39 type OLED (organic EL display), approx. 2,360,000 dots, video display (16: 9) area: approx. 1,770,000 dots		

#### **Included Accessories**

Battery (AG-VBR59), Battery charger (AG-BRD50), AC adaptor, AC cable, Microphone holder kit, Shoulder strap, Eye cup, Lens hood\*, Grip belt\* and Operating instructions (Items marked by an asterisk (\*) come already attached to the camera)

#### **Available Memory Card**

Available Memory Card							
Format	Memory Card Type		Bit Rate/ Recording Function	Speed Class			
			400 Mbps	Video Speed Class V60 or faster			
			FHD ALL-I VFR mode				
	SDXC/ microP2 card B series	microP2 card A series (64 GB)	200 Mbps				
MOV			150 Mbps	Video Speed Class V30 UHS Speed Class 3			
			100 Mbps	or faster			
			FHD LongG VFR mode				
			50 Mbps	Video Speed Class V10 UHS Speed Class 1 Speed Class 10 or faster			
AVCHD	SDHC/SDXC/	microP2 card	All	Speed Class 4 or faster			

#### **Recording Time**

Recording Format			64 GB	128 GB
		400 Mbps	Approx. 20 min.	Approx. 40 min.
SAC)	UHD	200 Mbps	Approx. 40 min.	Approx. 1 hour 20 min.
