

MTP60 is a pocket transmitter  
specially designed for professional wireless microphone applications

Multi-BAND  
RF

The multi-band MTP60 currently has the widest tuning range of any wireless transmitter on the market offering a massive range of frequencies to choose from.

Bluetooth 5  
Long Range

Monitor & control with Bluetooth via Wisycom Manager software or mobile device apps to adjust parameters in real time

Real Time  
Positioning

XYZ  
Accelerometer

Dedicated hardware for accurate real time positioning and advanced user interface for accessibility assistive gestures.

**LINEAR**  
Intermodulation FREE

Advanced linear technology eliminates intermodulation distortion for more robust signal, extended range, and the ability to operate multiple transmitters in close proximity to each other without needing an intermod

Ultrasonic  
HW Protection

Integrated low-pass audio filter eliminates ultrasonic interference from devices such as focus pullers

Embedded  
Recorder

Audio recording on  
memory card (SD)\*

Simultaneous transmit and audio recording on micro-SD (except in USA)

NB/WB

High Density  
SW selectable with NB filters

FPGA based signal processing allows easy switching between wide and narrow band operation which, together with "Linear" mode allows intermod free frequency planning with as little as 200kHz channel spacing

Haptic  
Engine

An integrated haptic engine that gives tactile feedback with different vibration patterns. This can also be activated by the remote control to discreetly alert users

Powering with 2 x AA battery (Alkaline, NiMh, Lithium) or MPRLBP lithium battery (5.55 Wh)

Small bodypack with ergonomic rounded edges for comfort in TV, theater, movies and other applications requiring discreet deployment.

\* Simultaneous recording and wireless transmission is not available on transmitters sold in the USA (code: MTP60-US-BT1)
